

BLANKETROL® II

Hyper-Hypothermia System with Active Cooling Technology

THE BLANKETROL® II IS A COST-EFFECTIVE PATIENT TEMPERATURE MANAGEMENT SYSTEM.

- Provides therapy in several departments of the hospital as needed
- Has 3 hose connectors, while other competitor products only have 2 hose connectors
- Internal by-pass (pre-warming & pre-cooling of water in the unit)
- 3 operating modes: Automatic, Manual and Monitor Only

The Blanketrol® II system offers a cost-effective and convenient way to warm or cool your patients. It also includes a pre-warming/cooling feature to simplify set-up. The unit's compact size and built-in handle provide ease of use with swivel casters that provide mobility and prevent the unit from tipping. A built-in storage drawer is included in the unit for storage of instruction manuals, probes, connector cables, and hoses.

Cincinnati Sub-Zero has been managing your patient's temperature needs for over 45 years.
