

# Maxi-Therm® Lite

Single Patient-Use Hyper-Hypothermia Blankets & Pads

## New and Improved!

**CSZ'S MAXI-THERM® LITE BLANKETS ARE BETTER AND STRONGER THEN EVER BEFORE.**

- The bonded pattern in the blanket is much stronger in these new blankets resulting in a longer lasting seal during usage.
- The new white material provides a cleaner feel, and in today's hospitals where Hospital Acquired Infections are an important issue, having a white blanket helps notify the caregiver when the blanket is soiled and needs to be changed.
- Maxi-Therm® Lite blankets, when used in conjunction with the appropriate heating or cooling equipment, are the best choice to provide temperature therapy to your patients.

Maxi-Therm® Lite Blankets and Pads are covered on both sides with a comfortable, soft, non-woven material, eliminating the need for a cover sheet. They are strong, lightweight and may be used under or over a patient to provide the temperature therapy.

*Cincinnati Sub-Zero has been managing your patient's temperature needs for over 45 years.*
